SAFETY FIRST

Why CES LTD

- Integrity & Quality
- Innovation & Performance
- Clients Priority
- Community & Teamwork

CES LTD

CREATIVE ENGINEERING SOLUTION

Experts of Design, Consultancy,
Supply, Installation & Fabrication for
PUMP, ELECTRO-MECHANICAL SYSTEM
& FIRE SAFTY SOLUTION

A reliable quality products &
service provider company

CES LTD

CREATIVE ENGINEERING SOLUTION

About Us

CES LTD is one of the growing Fire Safety & Electro-Mechanical Machineries importer, all kinds of Europe & USA Made-Marine, Fire Equipment's, Vehicles, Tractor, Generator, Industrial Domestic & Chemical Pump, Water Treatment Plant, CCTV & Access Control, Exhaust Fan,Chiller system, Electrical Distribution Board, Lightning, Protection System, LED Light, Boiler Spares,Agriculture Engines Spare, Accessories sales & complete solution provider engineering company in Bangladesh to various fields like Garments, Textile, Pharmaceutical, Commercial Building, Engineering disposable items and trading by our vast experience Engineer & Technician with high quality advance technological products, design, drawing as per NFPA, Hydraulic Calculation by approved software & our best service with our strong engineering team. The motive of our teamwork is dedication and professionalism and above all total client satisfaction. Our motive is to make our society convenient and continues development for better service through our product, service and solutions.

CES LTD promotes safety and security to protect life and property across major industries namely residential and commercial facilities textile & garments, oil and gas refineries,airports and aviation, health care and education, military and police, hospitality and leisure.

Fire Hydrant & Sprinkler System

Fire hydrant installation consists of a system of pipe work connected directly to the water supply main to provide water to each and every hydrant outlet and is intended to provide water for the firemen to fight a fire. The water is discharged into the fire engine form which it is then pumped and sprayed over fire. Where the water supply is not reliable or inadequate, hydrant pumps should be provided to pressurize the fire mains. Fire sprinkler systems are detect, control and suppress unwanted fires.the main goal for fire sprinklers is to dramatically reduce heat, flame,smoke, control fire growth, and provide additional time to safely exit a building.

Fire Detection & Alarm System

A fire alarm system has a number of devices working together to detect and warn people through visual and audio appliances when smoke, fire, carbon monoxide or other emergencies are present. ... Alarms can be either motorized bells or wall mountable sounders or horns.

Beam smoke detectors use a projected beam of IR light to detect smoke across large areas and are often used to detect fires in buildings where point detectors would be either uneconomical or their use restricted by the height of the building.
